

Observer Notes

Client – Project

[Designer: Copy the information below and paste it as many times as you have prototype lessons to test in the LTO. For each lesson of the prototype, work page by page through the lesson, noting the elements you wish to evaluate during the LTO in the Element column below in the sequence they appear in the lesson. Some examples of elements you might include are: Navigation, Interactive List, Multiple Select Question, Check Answer button, or System Simulation, basically, any item with which the learner has to interact.]

Name :

[Prototype Lesson Title]

Start Time: Finish Time:

Comfort Level Key:

- 1. **Very Comfortable** No hesitation, works with confidence.
- 2. **Comfortable** Slight hesitation, but no confusion.
- 3. **Neutral** Significant hesitation, somewhat confused – but no problems.
- 4. **Uncomfortable** Confused, problems arise that temporarily stop work, but that are quickly resolved.
- 5. **Very Uncomfortable** Very confused, serious problems arise that stop work until external intervention is provided.
